2.2.2 Publication Reference Date: 2019-02-20

2.3 Resource Description

2.3.1 Abstract: Deze dataset bevat 439 zwaartekrachtstations gemeten in de regio Philippeville. Gegevens werden in 2000 verkregen door het 'Centre Geophysique Interne', een samenwerking tussen de Koninklijke Sterrenwacht België, het National Geographic Institute en de Geological Survey Belgium. De LaCoste-Romberg D # 32-gravimeter werd gebruikt; na verwerking wordt in dit netwerk een MSE van 9,4 µgal bereikt.
